- Solid brass forged handles and escutcheons
- Multipoint lock system for optimum security
- 300 Series stainless steel and corrosion resistant materials perform in the toughest environments
- Single source for all door hardware assures great aesthetics including matching finishes, escutcheons and handles
- Exceeds 100,000 cycles for operational testing
- Available with interior thumb turn lock only or with exterior keylock with standard Schlage "C" keyway
- Mishandling device incorporated into the gear prevents inadvertent activation of the gear and potential damage to hardware, frame or panel
- "Ratcheting" action of the gear prevents the

system from returning to the locked position if the system is not fully opened

- Special UV stable bushings between handle and escutcheon for years of smooth operation
- Construction trim packages are available to protect hardware from jobsite abuse
- Handle extensions are available to allow clearance of interior window coverings: shutters, blinds, drapes, etc
- 10 year limited warranty against defects in workmanship and materials for all products, as well as against tarnish on the 5 Resista® finishes (polished brass, antique and satin nickel, polished and brushed chrome). This coverage applies to both residential and commercial applications.
