Innovative Industry-Leading Aesthetically Superior

With this extraordinary breakthrough in window technology, the locking hardware, normally visible on the side jamb of the window, is hidden. No lock latches to detract from the architecturally sculpted lines of the Aspen Collection Casement or Awning. And no hardware for your blinds to get hung up on! Complete the ambiance with an optional wood veneered screen that virtually disappears into the frame of the window.

Stunning - you bet. One of a kind - absolutely. The Aspen Collection unconditionally separates Sierra Pacific from the competition!

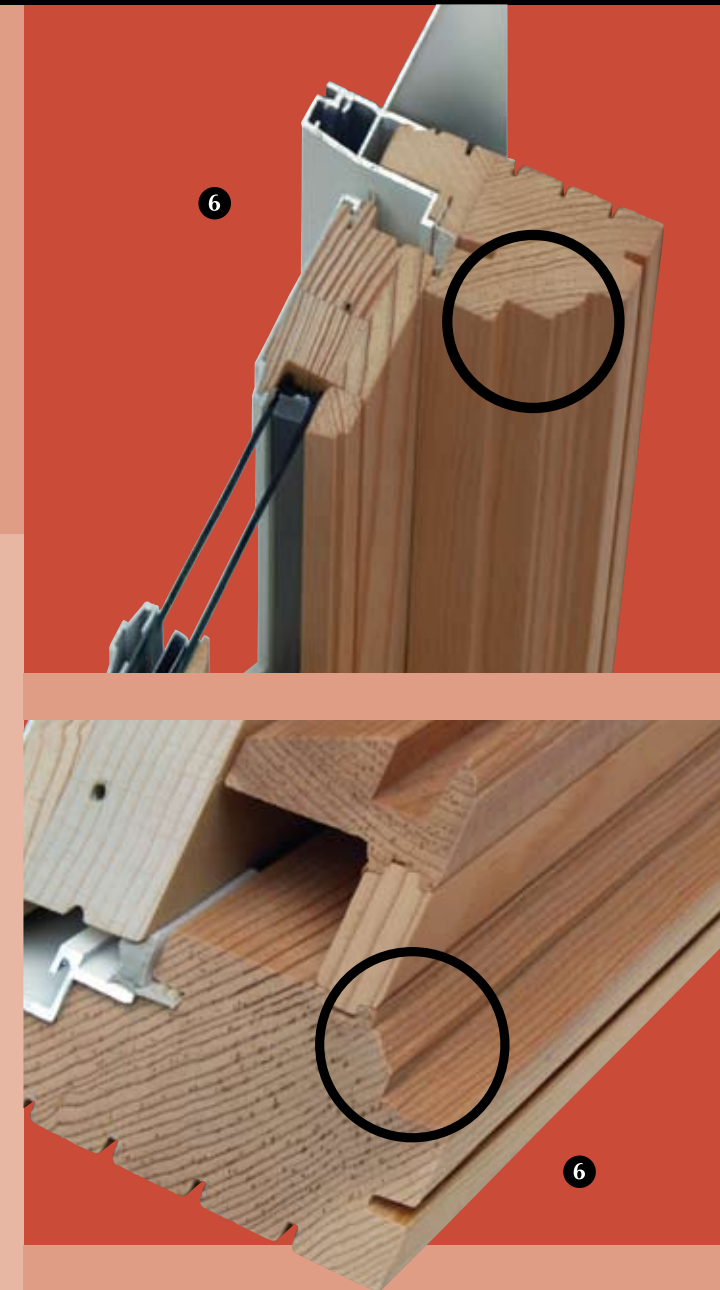

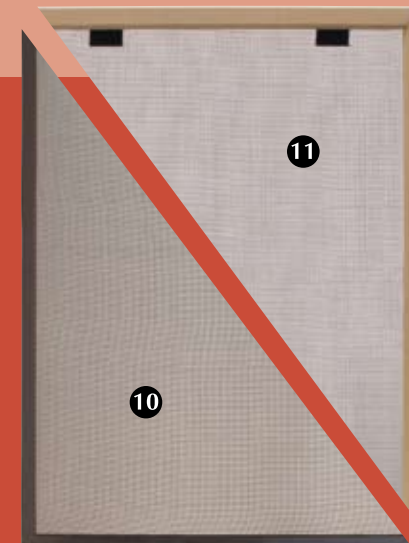

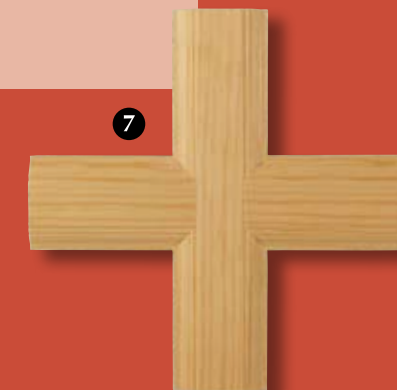

- 1 No visible locks on the window side jambs to detract from the architecturally sculpted lines of the Aspen - and no hardware for blinds to catch on.
- 2 Sash and frame components are manufactured from kiln-dried, preservative-treated Ponderosa Pine or Douglas Fir available in unfinished clear wood ready to accept stain or paint. An optional, factory-applied interior prime coat is available (except on the optional Premium wood screen).
- 3 The 1 3/4" thick Aspen sash is featured in our 2 1/4" Designer sash width only.

The Aspen Collection features our extruded aluminum clad exterior, available in more than 50 environmentally-friendly colors in 5 industry-leading color collections - and custom colors too.

- 4 The Aspen Collection windows feature a unique "single operating lock lever" located under the crank handle.
- 5 Truth Encore® hardware is standard and features a low profile folding handle with aesthetically pleasing nesting cover.
- 6 Aspen Collection windows feature our Colonial frame detail.
- 7 Aspen Collection windows also feature our Colonial simulite profile.
- 8 Lock hooks and lock keepers are completely integrated into the frame and sash.
- 9 Locks are not visible when the window is closed. No visible hardware on the side jamb to mar the warmth and beauty of the wood interior.
- 10 The standard screen is constructed with an aluminum frame and charcoal fiberglass cloth. The screen frame is available in black, white, copper, 03 bronze or chestnut bronze.
- 11 The Aspen Collection is also available with our optional Premium wood veneered screen. The Premium screen blends into the wood interior of the window for an aesthetically superior look - only wood is visible on the window jambs.

The Aspen Collection Casement and Awning windows have been tested to performance level C-40 per AAMA/WDMA/CSA 101/I.S.2/A440-05
