Sierra Pacific Windows

Value means exceptional windows and doors through innovation.

Clad Radius French Doors

Value means an architectural representative to keep your projects moving...

Talk about innovative... Sierra Pacific Windows is one of the few window and door companies that provides architects with an architectural specialist.

This means we know your job, your deadlines, your issues and your best solutions. Combine that with an architectural manual and CD-Rom so easy to use that you are up and drawing in less than 15 minutes.

Most architects utilize an architectural manual and CD-Rom to more easily specify windows and doors. We understand you want a manual that is clear, easy to use, complete and that can be used in conjunction with drag and drop DWG files.

In addition, Sierra Pacific provides you with easy-to-access PDF files for viewing and/or printing purposes. This convenient drag and drop interface is designed specifically for use in Auto Cad or most any of the popular architectural design programs.

Have a question or a special need? One simple phone call to your architectural specialist and you're on your way to completing your projects on time and on budget.

Sierra Pacific Windows has always been considered one of the most innovative and visionary window and door manufacturers in the industry. Personal sales representatives for first-class service, a complete line of fully extruded clad windows and doors and vast design flexibility are only the beginning of Sierra Pacific's success in raising the bar for builders, architects and homeowners. Sierra Pacific prizes innovation and vision in its products, services and business relationships. We are proud to introduce some of our latest innovations.

Multiple Simulite Bar Widths

Sierra Pacific Windows offers an intelligent solution for customizing your windows and doors: Contemporary and Colonial simulite profiles. We give you the flexibility to mix and match simulite widths in a window unit to create your unique design.

- Simulite bars available in 7/8", 1 5/16" and 2" widths
- Mix and match simulite bar widths in the same window unit
- Simulite bars available in Colonial and Contemporary profiles
- All simulite bar profile depths are identical
- Combine clad colors in a single unit for that custom look

Clad Radius French Doors

We offer you a state-of-the-art clad radius french door, complete with multi-point hardware... standard. With a fully extruded, single-piece aluminum head rail, rather than inferior two-piece rollform, this truly innovative door certainly raises the bar. We'll ship your doors complete—no pieces or parts to assemble on site—and better yet, all of our exterior profiles match... the passion is in the details.

- Head rail is fully extruded aluminum
- Bent aluminum profile matches standard door profile
- Radius lock rail is available
- All radius doors standard with multi-point hardware
- Available with a 12" bottom rail
- Available with handicap sill
- Doors are shipped assembled—with panels installed
- Clad doors available in Douglas Fir or Ponderosa Pine interior
- Now available - our new clad color palette featuring more than 50 clad colors in 5 industry-leading color collections
- Sidelights are available

Clad and Primed French Casement Windows

The newest clad and primed French casement window is certainly innovative—no exterior astragal and 15 standard sizes. These beautiful windows feature Truth® operators with HTL multi-point locking hardware. They are available in primed wood with Ponderosa Pine interior or clad with either Ponderosa Pine or Douglas Fir interior... beautiful. French casements offer all the advantages of our regular casement windows as well as an unobstructed view. Full screens are standard and grilles are available in either simulite or wood.

- 15 standard sizes from 42" to 60" wide
- All sizing follows our nominal width and height for ease of rough opening calculation
- Special sizes available between minimum and maximum sizing
- Both wood and clad units are tested and certified to a C-30 rating
- Locking handle located at the sill
- Hardware is available in either bronze or white
- Each sash has its own operator and operates independently
- Full screens are supplied with all units
- Stainless steel hardware is available for coastal applications
- Available with simulite or wood grilles
- Available in primed wood exterior with Ponderosa Pine interior or clad exterior with either Ponderosa Pine or Douglas Fir interior
