

WHAT MAKES OUR HARDWARE SO EASY TO LOVE?

We put a great deal of care into the selection of our hardware.

While we insist on beautiful designs and stylish finishes, that's just the beginning. We also demand superb engineering, smooth-as-silk operation, and long term durability.

We offer a variety of styles and finishes to enhance any architecture and any décor. Our door handles and escutcheon plates are forged solid brass.

For optimum security and superior weather resistance, all Sierra Pacific patio doors feature a multi-point locking system that has passed the most stringent forced entry requirements.
