**Nostalgia Meets Smart Engineering in  
Westchester Double Hung Window by Sierra Pacific Windows**

***New line achieves the high-end window market's narrowest  
check rail sightline, historically accurate sash proportions.***

Red Bluff, CA (February 19, 2019) – Turn of the century styling meets state of the art engineering in the new Westchester Double Hung Window, introduced by [Sierra Pacific Windows](http://SierraPacificWindows.com) at the 2019 [International Builders' Show](http://InternationalBuildersShow.com). The new line is designed to achieve the narrowest check rail sightline in the high-end window market, along with historically accurate sash properties.

“The design aesthetics of the Westchester recalls the charm and style of windows handcrafted more than a century ago,” said Vice President of Business Development Bob Taylor. “Combining that with Sierra Pacific’s smart engineering—and multiple patent-pending innovations — we’ve created a beautiful window with structural and thermal performance ratings rarely found in the Double Hung market.”

The window offers structural and thermal performance ratings, including:

- PG50 performance rating on most standard sizes
- 0.27 U-value with dual insulated Lo-E 366 and argon.
- Triple insulated glass U-value of 0.17

Other Westchester Double Hung Window features:

- 54"x108" maximum size for 1 ¾" sash
- 72"x120" maximum size for 2 ¼" sash
- Thermally broken sash construction
- Integral aluminum nail fin
- Patent-pending traditionally styled combination sash lock, sill end caps and drainage system, and multi-point tilt latch
- Constant force balances standard; optional Class 5 Hybrid Spiral Balance for sash up to 140 pounds
- Used for both residential and commercial applications

For more information on the Westchester Double Hung Window, visit Booth N1426 at the International Builders' Show, or go to [sierrapacificwindows.com](http://sierrapacificwindows.com) or call 800-824-7744.

## ABOUT SIERRA PACIFIC WINDOWS

Sierra Pacific Windows is a division of Sierra Pacific Industries, a family-owned forest products company. Based in Red Bluff, California, Sierra Pacific Windows is one of the largest manufacturers of superior quality, custom wood and vinyl windows and doors in the world. It is the only fully vertically-integrated window and door company, in which the company owns the forestland and manages the entire manufacturing and distribution process. Sierra Pacific Windows has a combined manufacturing production space of over 1.1 million square feet in California and Wisconsin. Its windows and doors are distributed via more than 600 dealers, distributors and company-owned locations.

## ABOUT SIERRA PACIFIC INDUSTRIES

Sierra Pacific Industries is a third-generation, family-owned forest products company based in Anderson, California. The company owns and manages 2 million acres of timberland in California and Washington, and is one of the largest lumber companies and largest manufacturer of millwork in the United States. Sierra Pacific Industries is committed to managing its lands in a responsible and sustainable manner to protect the environment while providing quality wood products and renewable power for consumers. The company's forests are certified under the Sustainable Forestry Initiative®. Sierra Pacific Windows utilizes nearly 100 percent of every piece of wood brought to its 18 mills and seven biomass-fueled cogeneration power plants.
